2. Teen Lifeline Training

The heart of Teen Lifeline is its Peer Counseling Hotline which provides troubled youth the opportunity to access immediate help from a Peer Counselor seven days a week, 365 days a year. Teen Lifeline's services extend statewide. Its hotline receives more than 6,000 calls a year from teens or those concerned about teens. That is why it is vital that Teen Lifeline recruit and train new peer counselors all the time, while sustaining its current group of teen volunteers.

More than 700 adolescents have received life skills training over the last 21 years as Peer Counselors in the program. In 2006, 25 teens were trained in life skills development, and a total of 52 active teen volunteers donated more than 7,000 hours of service to

Teen Lifeline. Further, more than 30,000 individuals were reached through Teen Lifeline's community education programs in middle schools and high schools.

Do you know a teen who is:

- At least 15 years old?
- The one their friends turn to with their problems?
- Needs volunteer hours & is committed to training?
- Interested in psychology and counseling?

If you answered YES to any of the above, have them call TEEN LIFELINE and become a PEER COUNSELOR!

Applications are available by calling the hotline between 3pm -9pm at. 602-248-8336 or visit our Website at: www.teenlifeline.org

16. Indian Land Tenure Foundation - Requests for Proposal Closing Date September 15th

Strategic Land Planning Workshops: Tribal Leaders and Staff

Closing date: September 15, 2008

The training courses will be developed for two audiences:

1. A 4 to 6 hour session for tribal leaders taking into account the limited time available to tribal officials and;
2. A two-day session for tribal planners, housing and natural resource staff, land office staff and interested tribal officials.

Course curriculum and materials for the two courses are available from ILTF and can be developed and adapted by tribal land office staff or others to meet a tribe's specific needs. Tribal staff and their training experts, if needed, can deliver the trainings. Upon completion of the training there will be sufficient data and information collected that a strategic land plan could be a logical next step if the tribe chooses to follow through with a planning process. The two courses set the groundwork and put into a framework the strategic land planning process.
